

eden[®]

How can I help?

Eden® ...your best choice for value for money shelving!

Quality, Versatility, Integrity and Strength - these are the key elements we have built into our shelving systems. Eden fixtures provide the weight-loading strength, versatility, and in-store appeal necessary to meet a wide range of retail requirements.

Our manufacturing plants in Adamov, Czech Republic, and Hirwaun, United Kingdom, each cover an area of 14,000 sqm. In Poland, we have a warehouse with an area of 807 sqm. Altogether, our production and storage areas total 28,807 sqm.

We manufacture shelving systems in sizes and configurations for every type of retail operation, to help you operate more efficiently and more profitably. Our high-quality, store-proven fixtures give you the best in reliability, consistency and performance. Engineered for reliability, durability and safety, Eden shelving excels.

Leveraging on our extensive network of distributors across Europe as well as strategically placed offices and a wide product offer, we are your ideal partner for your everyday shelving needs.

Choose Eden - choose the brand that helps stores work smarter!

Eden® ...ein Regalsystem mit Wert und Nachhaltigkeit!

Qualität, Vielseitigkeit sowie der flexible Einsatz sind die Hauptkriterien und wesentlichen Merkmale unserer Produkte. Diese Grundsätze fließen gezielt in die Entwicklung und die Produktion unserer Standard Regalsysteme sowie kundenspezifischen Lösungen ein. Einige der größten Europäischen Wiederverkaufsorganisationen vertrauen bei ihrer täglichen Arbeit auf die Basis von Eden Regalsystemen.

Unsere Produktionsanlagen in Adamov, Tschechische Republik, und Hirwaun, Vereinigtes Königreich, erstrecken sich jeweils über eine Fläche von 14.000 m². In Polen haben wir ein Lager mit einer Fläche von 807 m². Insgesamt belaufen sich unsere Produktions- und Lagerflächen auf 28.807 m².

Wir fertigen Regalsysteme in vielen Variationen, Abmessungen und Formen für die unterschiedlichsten Einsatzbereiche und Anforderungen. Unsere hohen Standards gewährleisten eine gleichbleibende Qualität und Beschaffenheit der bei uns in Lean Production gefertigten Materialien.

Unsere eigenen Eden Verkaufsbüros sowie ein umfangreiches Händlernetz in Europa stehen Ihnen jederzeit für Ihre Fragen rund um unsere Produktpalette, unsere Regalsysteme und Fertigungsmöglichkeiten gerne zur Verfügung.

Wählen Sie Eden - stellen Sie Ihre Verkaufsartikel auf eine solide Basis.

Eden® ...Votre meilleur choix de gondoles rapport qualité prix!

Qualité, Souplesse, Sûreté et Résistance, ce sont les mots clefs qui caractérisent notre gondole.

Tous les composants Eden assurent une capacité de charge garantie, une souplesse de montage, et une esthétique, indispensables pour répondre à tous les besoins d'une surface de vente.

Nos usines de fabrication à Adamov, en République tchèque, et à Hirwaun, au Royaume-Uni, couvrent chacune une superficie de 14 000 m². En Pologne, nous avons un entrepôt de 807 m². Au total, nos surfaces de production et de stockage s'élèvent à 28 807 m².

Profitant d'un réseau de distributeurs, de quelques bureaux commerciaux bien situés en Europe et d'une large gamme des produits offerts nous représentons pour vous un partenaire idéal pour tous vos besoins lors de l'agencement du magasin.

Nous fabriquons la gondole dans toutes les dimensions et variantes, adaptées pour chaque créneau de grande surface pour vous assurer le service plus efficace et rentable.

Optez pour Eden, la marque qui rend votre surface de vente plus accueillante!

Eden® ...gwarancja najwyższej jakości regałów sklepowych w Europie!

Jakość, Uniwersalność, Integralność i Wytrzymałość – to niepodważalne cechy naszych produktów. Regały Eden są gwarancją jakości, wytrzymałości na obciążenia i uniwersalności niezbędnej w każdym obiekcie handlowym.

Nasze zakłady produkcyjne w Adamovie, Czechy, oraz w Hirwaun, Wielka Brytania, zajmują powierzchnię po 14 000 m² każdy. W Polsce mamy magazyn o powierzchni 807 m². Łącznie nasze powierzchnie produkcyjne i magazynowe wynoszą 28 807 m².

Modułowe systemy regałów Eden zaprojektowane zostały z myślą o funkcjonalności, solidności, wytrzymałości oraz bezpieczeństwie. Oferowane są przez nas w szerokiej gamie kolorów i rozmiarów, w konfiguracjach umożliwiającym wykorzystanie w sklepach każdej branży.

Każdy wyprodukowany element systemu Eden jest sumą doświadczeń najlepszych inżynierów w branży. Z każdym elementem otrzymujecie Państwo naszą gwarancję jakości produktu i usług.

Look for the brand

All our components are clearly stamped with the **Eden logo** to make them easily identifiable and to make sure that all our customers can easily distinguish them from other shelving systems.

Alle unsere Produkte sind mit dem **Eden Markenzeichen** klar gekennzeichnet und somit für jeden leicht erkennbar. Das Eden Logo verhindert Verwechslungen mit anderen Systemherstellern.

Tous nos composants sont estampillés avec le **logo Eden**, ce qui permet à nos clients de les identifier et de les distinguer des autres systèmes de gondoles.

Wszystkie nasze elementy są wyraźnie i trwale oznakowane **logiem Eden**, aby ułatwić ich identyfikację i umożliwić naszym Klientom bezproblemowe odróżnienie ich od innych systemów regałowych.

N.B. Standard upright extensions are only for increasing the back panel height, not for supporting shelves.
Other lengths available on request.

Achtung: Säulenverlängerungen sind nur zur Erhöhung der Rückwände ausgelegt und können keine Regalbodenlasten aufnehmen.
Andere Längen auf Anfrage.

NB: Les éclisses de montants permettent uniquement de prolonger le fond tôle mais ne peuvent recevoir de tablettes. Autres longueurs disponibles sur demande.

UWAGA: Przedłużki stojaków przeznaczone są jedynie do podwyższenia ścianek tylnych, nie zalecamy montowania na nich półek. Inne długości dostępne na zapytanie.

Weight Loadings

Zulässige Belastungswerte | Capacités de charge | Dopuszczalne obciążenia

How to Calculate Recommended Weight Loadings:

1. The overall weight loading of a bay depends upon the upright height, size and depth of the overselves.
2. An overself must never exceed the depth of the base shelf and must always be arranged with the shelf depth increasing from the top to the bottom.
3. Take the average size of the overselves, and use this as the guide for the maximum weight loadings in Table 1. This gives the maximum weight loading for a single-sided wall bay or gondola, excluding the base shelf loading.
4. Take each individual shelf size in Tables 2, 3 or 4, to give you the maximum weight loadings for individual shelves.

Berechnungsverfahren zur Ermittlung der zulässigen Belastungswerte:

1. Die zulässige Gesamtbelastung einer Regaleinheit (=Summe Einhängeböden) ist abhängig von der Säulenhöhe, dem Säulenquerschnitt und der durchschnittlichen Tiefe der eingehängten Fachböden.
2. Die Tiefen der Einhängeböden dürfen in keinem Fall die Tiefe des Basisbodens überschreiten und müssen von oben nach unten zunehmen - bzw. zumindest gleichbleibende Tiefen aufweisen.
3. Mit der durchschnittlichen Tiefe der Einhängeböden geht man in Tabelle 1 und ermittelt dort - in Abhängigkeit von Säulenhöhe und -querschnitt die maximale Belastung. Dies ist dann die zulässige Lastsumme aller eingehängten Böden (ohne Unterboden), welche auf einer Seite von Wand-bzw. Gondeleinheiten aufgebracht werden darf.
4. Für den einzelnen Fachboden ergibt sich die zulässige einzellast in Abhängigkeit von Achs Maß und Tiefe sowie der verwendeten Konsole bzw. Fußteil aus Tabelle 2, 3 oder 4.

Comment calculer les capacités de charges recommandées:

1. La capacité de charge totale d'une baie est fonction à la fois de la hauteur du montant, et de la longueur et profondeur de la tablette.
2. La profondeur d'une tablette ne peut jamais être supérieure à celle du pied, et les profondeurs de tablettes doivent être obligatoirement décroissantes de bas en haut.
3. Lorsque vous avez différentes profondeurs sur une baie, calculez leur moyenne, et reportez vous au Tableau 1, pour avoir la charge maximum admissible pour un meuble simple face ou une gondole centrale, sans tenir compte de la capacité de charge du pied.
4. Les tableaux 2, 3 ou 4 vous donnent la charge maximum admissible par tablette, en fonction de leurs dimensions et du type de console utilisée, tout en respectant la capacité de charge maximum du meuble.

Jak obliczyć dopuszczalne obciążenie:

1. Dopuszczalne obciążenie regału zależy od przekroju i wysokości stojaka oraz głębokości półek górnych.
2. Głębokość dowolnej półki górnej nie może być nigdy większa niż półki bazowej. Głębokości półek powinny się zmniejszać ku górze regału.
3. Oblicz średnią głębokość półek górnych i użyj obliczonej wartości dla wyznaczenia maksymalnego obciążenia regału w Tabeli 1. Wyznaczona wartość wskazuje dopuszczalne obciążenie regału przysięnnego oraz każdej strony gondoli, bez półek dolnych.
4. W Tabeli 2, 3 lub 4 sprawdź dopuszczalne obciążenia dla poszczególnych półek.

	80 x 30 mm	437	370	307	257	213
	110 x 30 mm	600	510	450	403	367
H 1810 mm	60 x 30 mm	280	223	177	N.A.	N.A.
	80 x 30 mm	463	380	313	263	227
	110 x 30 mm	600	510	450	407	373
H 1610 mm	60 x 30 mm	290	230	190	N.A.	N.A.
	80 x 30 mm	490	390	320	270	240
	110 x 30 mm	600	510	450	410	380

Stated loads are calculated for maximum recommended loading height of 2410 mm, 2210 mm, 2010 mm, 1810 mm and 1610 mm high shelving bays. Weight loads of intermediate bay heights can be calculated by interpolating these values. Maximum weight loadings are shown for single-sided wall bays or gondolas excluding the base shelf. Shelf depths increase from top to bottom. For special configurations of height and depths consult Eden.

Angegebene Belastungswerte der Basisregale beziehen sich auf eine empfohlene maximale Regalhöhe von 2410 mm, 2210 mm, 2010 mm, 1810 mm und 1610 mm. Belastungswerte für z.B. abweichende Höhen, können durch Interpolation der bekannten Werte ermittelt werden. Die maximalen Belastungswerte beziehen sich auf einseitige Wandregale oder Gondeln ohne den entsprechenden Grundfachboden. Regaltiefen erhöhen sich ausschließlich von Oben nach Unten. Für Belastungswerte von Sonderkonstruktionen (Höhen und Tiefen) wenden Sie sich bitte direkt an Eden.

Les charges indiquées sont maximum et pour des hauteurs de montants de 2410 mm, 2210 mm, 2010 mm, 1810 mm et 1610 mm. Pour des hauteurs intermédiaires, il suffit d'extrapoler. Les charges indiquées sont valables pour configuration en simple et double face et avec des profondeurs de tablettes décroissantes de bas en haut et sans tenir compte du pied. Pour une autre configuration consultez-nous.

Powyższe dopuszczalne obciążenia obliczone są dla regałów o wysokości 2410 mm, 2210 mm, 2010 mm, 1810 mm i 1610 mm, Dopuszczalne obciążenia dla wysokości pośrednich mogą być obliczone przez ekstrapolację podanych wartości. Podane dopuszczalne obciążenia odnoszą się do regałów przyściennych oraz każdej strony gondoli i nie uwzględniają półki dolnej. Głębokości poszczególnych półek nie mogą przekraczać głębokości półki dolnej (patrz rys.).

Eden solvent-free powder coating

Our paint lines operate to strict standards of modern environmental production. Painted steelgoods are 100% solvent-free, with only lead-free (TGIC) powder being used. In the pre-treatment plants only biodegradable (organic) chemicals are used. Electrostatic powder coating is used to produce a consistent, durable finish.

Eden Pulverbeschichtungsanlage

Unsere Pulverbeschichtungsanlagen arbeiten nach neuesten Regeln modernster Umwelttechnologien. Durch den Einsatz von schwermetallfreien Pulver (TGIC) sind die beschichteten Metallorberflächen 100% Lösungsmittelfrei. In der Vorbehandlung werden biologisch abbaubare Chemikalien eingesetzt. Die Eden Pulverbeschichtung gewährleistet eine sehr gute Dauerbeständigkeit der Oberfläche. Technisch bedingte, geringfügige Farbabweichungen bleiben vorbehalten.

Le système de poudrage Eden

Notre chaîne de peinture respecte les normes environnementales, avec des peintures sans solvant, et une poudre utilisée répondant à la norme (TGIC). Pour le pré-traitement seuls des produits biodégradables sont utilisés. La finition poudre EPOXY donne une finition impeccable et durable.

Regały Eden pokrywane są farbami proszkowym nie zawierającymi rozpuszczalników. Nasze lakiernie proszkowe funkcjonują w zgodzie z najbardziej rygorystycznymi przepisami ochrony środowiska. Używane przez nas farby proszkowe nie zawierają rozpuszczalników ani ołowiu. Podczas procesu poprzedzającego lakierowanie używamy wyłącznie organicznych substancji chemicznych ulegających biodegradacji. Elektrostatyczne lakierowanie proszkowe zapewnia jednolitą i trwałą powierzchnię ochronną naszych regałów.

MANUFACTURING BASE

CNC PUNCHING

The TruPunch Series is distinguished by its excellent productivity and expanded automation solutions.

It is the most productive punching machine in the world, accurate, flexible and highly reliable.

LASER CUTTING & PUNCHING

A state of the art Amada laser machine providing very good punching and laser opportunities, capable of processing various materials up to 10 mm thickness.

PRESS BREAK

TruBend Series combines innovative technology and high precision. Variable backstop, laser adaptive measuring and quick hydraulic changeover, ensures our results are accurate.

The entire process - from programming through preparation to the actual bending - is extremely productive.

WELDING

Fully equipped welding stations, to ensure high quality of welding in both: TIG and MIG technologies.

ASSEMBLY STATIONS

Our assembly department offers the finishing touch in a white glove environment, from rivetting to nutserting, bolting, gluing or capping.

eden[®] DESIGN

WINE EXPERT

Need help
with
choosing?

Design & Services

Select from the services that will move your business forward.

Whether you're a retailer, a brand, or distributor, we're here for you. With the right mix of services, we can help your business grow.

Creative design

Novel innovative ideas that target shoppers' needs, thus improving their shopping experience and increasing sales. By examining shopper behaviour, we're able to create solutions that make shopping in your store more engaging. With our creative design team in Wellingborough and Adamov, we'll add a richly experienced and highly qualified perspective to your projects.

Design and development

We'll develop sustainable, value-added solutions that support your vision. We focus on results, and our engineering approach brings value where you really need it - in the store. We look to deliver the best possible value, because we too are guided by your business objectives.

Proven in practice

If you need to improve product accessibility, assess merchandising capability, and understand your operating results, our prototypes give you a clearer idea of what can be expected in your store.

Before starting to use steel, plastic or wood, we always ensure that products are designed with added value comply with your business objectives.

Manufacturing and global operations

We're able to deliver our projects quickly and reliably throughout Europe and the United Kingdom. The adoption of lean manufacturing, combined with the 80/20 philosophy, means we're able to deliver products incredibly fast, with the high quality you require.

Logistics and consolidation

We offer more than just manufacturing, we want to provide a comprehensive service. Thanks to the strategic location of our manufacturing plants and warehouses in the United Kingdom and in several places in continental Europe, we're able to consolidate orders from multiple suppliers and quickly respond to sudden changes in demand.

Installation

Installations are carried out by qualified teams who are able to handle any of your project's specific and unique needs.

We perform the installation to the highest safety standards and in the shortest time periods in order to guarantee minimal store disruption.

Refurbishing and reuse

We breathe new life into old products to support your environmental objectives and save you money.

During disassembly, we assess their condition and sort them for subsequent refurbishment or reuse. In addition to cost savings of around 30%, this can help you achieve your sustainability objectives

Gondola shelving

The Eden gondola shelving system is recognised for its quality, which it has been relied on for over 20 years by some of the most successful chain stores as their main system. We produce standard shelving units as well as specialised bespoke solutions tailored to the retailers or brands.

ASDA George Home & Baby Fixtures

Scope

To develop a series of approved conceptual and technical designs through to prototype and manufacture creating feasible production methods and materials to achieve a cost per item objective throughout the range.

Activity

Design development throughout the range of fixtures and furniture with detailed design intent drawings and thoroughly supported BOM (bill of materials) to meet agreed parameters.

Outcome

Eden successfully produced a series of crafted, premium fixtures in-line with the technical drawing pack to ensure a consistent look & feel throughout the ASDA Home & Baby fixture range.

ASDA's target was to achieve a two year ROI. The initial trial stores delivered a positive outcome of up to 10-18% uplift in sales.

With a retailer target of 8% the fixtures are expected to rollout as they have achieved a minimum of 10% uplift.

"What a transformation this has been. A huge thanks to Eden in the journey up to this point, we could not have got to this stage without you and your hard work.

Likewise, thanks to all those who have challenged the proposition along the way with the end customer in mind, the tweaks and changes have been worth the effort and now our customers can enjoy the results!"

Eddie Morris
ASDA - Store Design Manager

Duracell

B&Q Tactical Fixture

Scope

This permanent display needed to represent Duracell's premium quality, citing it above its competitors and requiring a floor-standing display which could be tactically positioned into strategic spaces at the hardware/DIY retailer, ensuring shopper engagement and retailer buy-in.

Activity

Immersion into the Duracell brand enabled Eden's creative team to sympathetically represent the brand. Concept sketches shared with Duracell, established a creative direction, leading to 3D visuals to develop and refine the design.

Use of Augmented Reality and a virtual, 3D rendered walk-through, enabled validation of the design for Duracell and fast-tracked the sell-in process for B&Q.

High quality metal fabrication delivered the premium quality expected by Duracell with a robust and stable structure, ensuring the longevity expected from a permanent fixture.

Outcome

The fixture was rolled out to all 300 B&Q stores in the UK and achieved an increase in sales of 317% versus the Cardboard FSDU execution it replaced. The additional facings gained by the 3-sided design, allowed for incremental SKU listings and resulted in a further increase in sales to 379%.

"Working closely with Eden, we were able to develop a new permanent fixture with great standout by using strong Duracell branding and clear product navigation, for shoppers to purchase from."

Duracell UK - Premium & Specialist Retail

ASDA

Digital Brand Gantry

Scope

This versatile staging area was designed to create maximum impact at the front of ASDA superstores. The gantry's flexibility allows for various promotions to be accommodated seamlessly.

Each segment within the modular structure can be tailored to utilise elements such as shelving / hooks / screens / lightboxes / stretch fabric displays and card POS.

Activity

Eden created a series of visual concepts illustrating how different promotions could be represented. ASDA ultimately settled on a sponsored display by Diageo.

From initial concept we moved into the engineering phase where we introduced uprights to ensure complete flexibility and adaptability for each unique promotional requirement.

Additionally, there are base drawers to store any components not needed for a particular promotional campaign.

Outcome

ASDA's branded gantry was set up in the ASDA Auditorium and is already being reviewed for various promotions in the coming months.

This showcases EDEN's creativity extending seamlessly into engineering excellence.

ALDI

Circular refill collaboration

Scope

We're delighted to announce that after 3 years of hard work and collaboration Eden and our sister company Trade Fixtures have today witnessed the launch of a brand new solution for refill and reuse in Aldi's Solihull branch!

Activity

Together with GoUnpackaged, Aldi UK, Ocado Retail, CHEP, Berry Global, Inc., and DIGI Europe Ltd, and supported by Innovate UK, it has been a pleasure to be part of a group of industry leaders driving to create retail solutions that will become an industry standard.

The refillable supply chain vessel can be used by any supplier or retailer, reducing costs, food waste and increasing the number of store types that can sell refills.

Outcome

If every household in the UK refilled just one item per week, this would eliminate over 1.4 billion items of single-use packaging per year (Based on 2022 ONS figure of 28.2 million households in the UK).

This Refill Station provides not only a sustainable option for store and customer alike, but provides an easy-to-use cost-effective solution for households looking to cut costs - 'Always a better price than packaged!', and we think you'll agree - looks great too!

Poundland

New Format stores

Scope

Poundland's recent retail estate expansion saw them offering a broader range of products, moving into categories such as clothing, chilled/frozen foods, fresh produce and seasonal items.

By proposing a range of practical fixtures for these new categories, Eden would look to align with existing kit and ensure unity throughout the new format proposal.

Activity

Our project team formed an efficient partnership with Poundland to review and refine the design proposals to the stage where concepts could be progressed to final engineered drawings.

Once approved, we transitioned into procurement and manufacture of new equipment and briefed our installation teams on requirements for each store.

Outcome

Eden provided the turn-key solution for all merchandising systems and fixtures within the first of Poundland's new format stores, located in Nottingham Riverside and Teesside Retail Park.

The success of these two marquee stores resulted in the new format schedule being expanded with Eden retained to supply all merchandising fixtures.

"The fit-out standards were fantastic and right where we needed them to be. This was a great job on this one by all involved at Eden."

Well done to the team and thanks for your continued support."

Neil Evans
Poundland - Head of Format Development

Co-op

Loss prevention initiatives

Scope

We're delighted to be working with Iceland and Co-op amongst other retailers, on their security initiatives. Loss prevention has become a primary concern for many retailers as they see a sizeable upturn in the amount of leakage in store, leading to huge financial losses, so innovative solutions are needed to be implemented quickly!

Activity & Outcome

Eden have designed, developed and installed 'Beers, Wines & Spirits' lockable security cabinets within numerous Iceland stores, and we are also implementing a lockable BWS cabinet solution within Co-op that features a call-to-action button - allowing customers to easily inform a member of staff when they require assistance.

Checkouts and SCO's

Innovation & fresh thinking

Virtual reality

Company Eden offers for the presentation of all product solutions needs of virtual reality or also through digital projection by means of special cinema screen. Customers can use both options for more detailed familiarization with the Eden products, with their different options and technical parameters, possibly as an additional service too for their own solution space management or merchandising. It is possible to get acquainted with digital projection personally directly in Adamov, appropriately by the means of virtual video conference. The digitization of the business environment elements allows customers to speed up significantly the whole process of prototyping.

Eden bietet interaktive Präsentationsmöglichkeiten der im Programm befindlichen Produktlösungen mittels virtual reality oder durch digitale Projektion auf spezielle Kinoleinwände. Unsere Kunden können so Eden Produkte, ihre unterschiedlichen Anwendungsbereiche und technischen Parameter besser kennenlernen und zusätzlich ihre eigenen kundenspezifischen Lösungen für ein optimales Raummanagement und Merchandising integrieren. Selbstverständlich bieten wir Ihnen die Möglichkeit sich mit dieser Technologie direkt in unserem Werk in Adamov vertraut zu machen oder an einer virtuellen Videokonferenz teilzunehmen. Die Digitalisierung von Einrichtungselementen und -materialien ermöglicht einen virtuellen Rundgang durch einen neu gestalteten Markt um so den gesamten Prozess des Prototypings deutlich zu beschleunigen.

Eden propose des moyens de "réalité virtuelle" ou encore une projection numérique à l'aide d'un écran de projection spécial pour la présentation des solutions de produits. Les clients peuvent s'en servir pour se familiariser avec les produits d'Eden, leurs variantes et leurs paramètres techniques. Ils peuvent les utiliser éventuellement en tant que service complémentaire lors de leur propre gestion de l'espace ou encore de la commercialisation des produits. Il est possible de faire une démonstration sur place à Adamov ou par l'intermédiaire d'une téléconférence. La numérisation des produits en milieu commercial permet aux clients d'accélérer tout le processus de réalisation de prototypes.

Do prezentacji wszystkich rozwiązań produktowych Eden oferuje środki rzeczywistości wirtualnej czy też projekcję cyfrową za pośrednictwem specjalnego kino ekranu. Z obu opcji klienci mogą skorzystać w celu szczegółowego zapoznania się z produktami Eden, ich różnymi odmianami oraz parametrami technicznymi, ewentualnie również jako z usługą dodatkową przy rozwiązywaniu spacemanagementu czy merchandisingu. Z projekcją cyfrową można zapoznać się osobiście bezpośrednio w miejscowości Adamov, ewentualnie za pośrednictwem konferencji wirtualnej. Digitalizacja elementów środowiska biznesowego umożliwia klientowi wyraźne przyspieszenie całego procesu opracowywania prototypu.

THE CIRCULAR REFILL SYSTEM

New product

Features & Benefits

BUILT IN SCOOP OR TONG HOLDER

Ingenious designed built in scoop or tong holder that works with a tether to keep them secure on the bin.

EASY TO CLEAN & DISHWASHER SAFE

The scoop bins are National Sanitation Foundation (NSF) approved to the ANSI18 level, ensuring the ease of cleaning with rounded corners and dishwasher -safe to high rinse temperatures.

Allows you to merchandise those “hard to flow” products. Available in different sizes and styles to best suit your needs.

Scoop Bins - TRITAN-BPA FREE: 12L, 17L, 18L and 27L*

Part No	Description	
08100TR	Scoop bin 12L 20x30x33 cm	

Part No	Description	
08108TR	Scoop bin 17L 20x33x43 cm	

Part No	Description	
08300TR	Scoop bin 18L 30x33x33 cm	

Part No	Description	
08308TR	Scoop bin 27L 30x33x43 cm	

***TRITAN:** Material from US Eastman company, properties of durability, resistance, transparency and cleanable in dishwasher up to 82°. No other bins on the market can sustain this high temperature without deformation.

RHINO® GRIND

Nut Butter Grinder

About RHINO® Grind

QUALITY MATERIALS

Made from stainless steel and extremely durable resin, these grinders will hold up to regular wear and tear. No overheating or shutdown means staying in service for you and your customers.

CLEANLINESS

With an outer shell made of food grade aluminum this unit is easier to clean than other grinders. Each unit includes a “sneeze guarded” dispensing spout with a patented duckbill valve and a removable catch tray, keeping product from being exposed to air.

The RHINO Grind - a grinder that doesn't lock-up, overheat, and has the ability to grind all different types of nuts, both whole and pieces!
